DETAILED ACTION

Claim Objections

1. Claims 8, 9, and 12 are objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to refer back to and further limit the subject matter of a previous claim. The claims are dependent upon cancelled claim 7. Accordingly, the claims have not been further treated on the merits.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 14-16 are rejected under 35 U.S.C. 102(b) as being anticipated by Rehberger (US Patent Number 2,069,048).

Rehberger discloses a fluid dispenser comprising a fluid reservoir (10) containing a fluid; an actuating wall that, when pressed, puts the fluid in the reservoir under pressure; a dispensing orifice (25) through which the fluid is dispensed; a removable closure member (not shown, see column 1, line 42) that closes the dispensing orifice; a recovery dish (16) formed at the outlet of the dispensing orifice so that fluid dispensed through the orifice collects in the dish; wherein the dispensing orifice is formed at the bottom of the recovery dish; and wherein the recovery dish has a concave shape.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

5. Claims 1 and 14-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Rado (US Patent Number 3,011,293) in view of Rehberger.

Rado discloses a two-sheet fluid dispenser with a deformable actuating wall and a dispensing orifice provided in one of the sheets. Rado fails to disclose the concave recovery dish. Rehberger discloses a concave recovery dish used with a similar deformable wall dispenser. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have used the concave recovery dish of Rehberger with the fluid dispenser of Rado in order to leave a desired quantity of fluid in the dish as taught by Rehberger.

Allowable Subject Matter

6. Claims 2-6, 11, 13, and 19-22 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

7. Applicant's arguments with respect to claim 1 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
